	Response
Are there any estimates of the health impacts and costs of illnesses associated with or exacerbated by cold damp homes? Just wondering if there's an ability to quantify this co-benefit.	The most recent and useful thing on this is the report from NEA here, esp. pages 8-9 <a href="https://www.nea.org.uk/wp-content/uploads/2020/06/Connecting-Homes-for-Health-Executive-Summary-FINAL.pdf">https://www.nea.org.uk/wp-content/uploads/2020/06/Connecting-Homes-for-Health-Executive-Summary-FINAL.pdf</a>
What measures are you installing via your LAD at Islington (is it all primary and secondary)? I assume this is to allow you to fully fund?	Under floor insulation, cavity wall insulation, internal wall insulation, loft insulation and secondary glazing. 1/3 cost from tenanted properties to be provided by landlord, including social housing providers.
At SCDC we've had council house residents wanting us to uninstall air source hest pump and go back to gas. Have you encountered this push back?	We haven't yet
